"protected" members

Code Smell

Underscores should be used to make large numbers readable

Code Smell

"ToString()" calls should not be redundant

Code Smell

"==" should not be used when "Equals" is overridden

Code Smell

An abstract class should have both abstract and concrete methods

Code Smell

Multiple variables should not be declared on the same line

Code Smell

Culture should be specified for "string" operations

Code Smell

"switch" statements should have at least 3 "case" clauses

Code Smell

break statements should not be used except for switch cases

Code Smell

String literals should not be duplicated

Code Smell

Files should contain an empty newline at the end

Code Smell

Unused "using" should be removed

Code Smell

Non-derived "private" classes and records should be "sealed"

Analyze your code

Code Smell Minor ?

private classes and records aren't visible outside of their assemblies anyway, so if they're not extended inside the assemblies, they should be made explicitly non-extendible with the addition of the sealed keyword.

Noncompliant Code Example

```
private class MyClass // Noncompliant
{
    // ...
}

private record MyRecord // Noncompliant
{
    // ...
}
```

Compliant Solution

```
private sealed class MyClass
{
    // ...
}

private sealed record MyRecord
{
    // ...
}
```

Available In: sonarlint | sonarcloud | sonarqube

A close curly brace should be located at the beginning of a line

 Code Smell

Tabulation characters should not be used

 Code Smell

Methods and properties should be named in PascalCase

 Code Smell

Track uses of in-source issue suppressions
