Code Smell

Underscores should be used to make large numbers readable

Code Smell

"ToString()" calls should not be redundant

Code Smell

"==" should not be used when "Equals" is overridden

Code Smell

An abstract class should have both abstract and concrete methods

Code Smell

Multiple variables should not be declared on the same line

Code Smell

Culture should be specified for "string" operations

Code Smell

"switch" statements should have at least 3 "case" clauses

Code Smell

break statements should not be used except for switch cases

Code Smell

String literals should not be duplicated

Code Smell

Files should contain an empty newline at the end

Code Smell

Unused "using" should be removed

Code Smell

Methods should not return values that are never used

Analyze your code

Code Smell Minor design unused

Private methods are clearly intended for use only within their own scope. When such methods return values that are never used by any of their callers, then clearly there is no need to actually make the return, and it should be removed in the interests of efficiency and clarity.
