Code Smell

Underscores should be used to make large numbers readable

Code Smell

"ToString()" calls should not be redundant

Code Smell

"==" should not be used when "Equals" is overridden

Code Smell

An abstract class should have both abstract and concrete methods

Code Smell

Multiple variables should not be declared on the same line

Code Smell

Culture should be specified for "string" operations

Code Smell

"switch" statements should have at least 3 "case" clauses

Code Smell

break statements should not be used except for switch cases

Code Smell

String literals should not be duplicated

Code Smell

Files should contain an empty newline at the end

Code Smell

Unused "using" should be removed

Code Smell

"for" loop increment clauses should modify the loops' counters

Analyze your code

Code Smell Critical ? confusing

It can be extremely confusing when a `for` loop's counter is incremented outside of its increment clause. In such cases, the increment should be moved to the loop's increment clause if at all possible.

Noncompliant Code Example

```
for (i = 0; i < 10; j++) // Noncompliant
{
    // ...
}
```

Compliant Solution

```
for (i = 0; i < 10; i++)
{
    // ...
}
```
