Code Smell

Underscores should be used to make large numbers readable

Code Smell

"ToString()" calls should not be redundant

Code Smell

"==" should not be used when "Equals" is overridden

Code Smell

An abstract class should have both abstract and concrete methods

Code Smell

Multiple variables should not be declared on the same line

Code Smell

Culture should be specified for "string" operations

Code Smell

"switch" statements should have at least 3 "case" clauses

Code Smell

break statements should not be used except for switch cases

Code Smell

String literals should not be duplicated

Code Smell

Files should contain an empty newline at the end

Code Smell

Unused "using" should be removed

Code Smell

Files should contain an empty newline at the end

Analyze your code

Code Smell Minor ? convention

Some tools work better when files end with an empty line.

This rule simply generates an issue if it is missing.

For example, a Git diff looks like this if the empty line is missing at the end of the file:

```
+class Test
+{
+}
\ No newline at end of file
```
