Code Smell

Underscores should be used to make large numbers readable

Code Smell

"ToString()" calls should not be redundant

Code Smell

"==" should not be used when "Equals" is overridden

Code Smell

An abstract class should have both abstract and concrete methods

Code Smell

Multiple variables should not be declared on the same line

Code Smell

Culture should be specified for "string" operations

Code Smell

"switch" statements should have at least 3 "case" clauses

Code Smell

break statements should not be used except for switch cases

Code Smell

String literals should not be duplicated

Code Smell

Files should contain an empty newline at the end

Code Smell

Unused "using" should be removed

Code Smell

### Redundant parentheses should not be used

Analyze your code

Code Smell Minor Quick Fix unused finding

Redundant parentheses are simply wasted keystrokes, and should be removed.

#### Noncompliant Code Example

```
[MyAttribute()] //Noncompliant
class MyClass
{
    public int MyProperty { get; set; }
    public static MyClass CreateNew(int propertyValue)
    {
        return new MyClass() //Noncompliant
        {
            MyProperty = propertyValue
        };
    }
}
```

#### Compliant Solution

```
[MyAttribute]
class MyClass
{
    public int MyProperty { get; set; }
    public static MyClass CreateNew(int propertyValue)
    {
        return new MyClass
        {
            MyProperty = propertyValue
        };
    }
}
```
